Proficiency

· Debugging

· Coding

· Networking

· Web Development

· Database Management

· Problem Solving

· Creativity

· Adaptability

· Teamwork

· Interpersonal skills

Certification

· 2019 - Web Development

· 2022 - Reactjs

· 2022 - SQL

Expertise

· HTML, CSS & Js

· PHP

· Java

· Nodejs

· Reactjs

Projects

1) Developed CryptoCurrency Tracker using ReactJs. (02/2022 - 03/2022)

· Contributed to the development of a full-stack web application for tracking cryptocurrency prices. Managed the backend of the website and collaborated with a team member on the front-end implementation using Reactjs.

2) Developed E-commerce using PHP. (10/2021 - 01/2022)

· Designed the database structure and implemented key features such as product management, shopping cart, and secure payment processing.
· Utilized various PHP libraries to enhance user experience and ensure scalability.
· Integrated the platform with third-party services for shipping and tax calculation.
· Demonstrated expertise in web development and proficiency in using PHP.

3) Realtime Chatapp using PHP(Websockets). (06/2022 - 07/2022)

· My role was to manage the frontend and oversee the design and implementation of backend logic.
· Managed User authentication.
